Forecast for Thursday 28 Nov 2024

Weather: Clear conditions overnight with frost and icy stretches developing on untreated surfaces. A few mist and fog patches to start the day but otherwise a bright or sunny morning, cloud thickening during the afternoon with some light rain or drizzle at times around western mountains, strengthening Southeasterly winds adding to the windchill on the hills.

Chance of cloud-free hill tops above 800m: 70%, patchy low cloud on the mountain tops at first, increasing low cloud later.

Low Cloud and visibility: Patchy cloud above 700m at the start of the day but otherwise mostly clear mountain tops expected. Cloud thickening and lowering during the afternoon with scattered layers above 600m particularly on southern hills. Excellent visibility expected in the morning becoming moderate by late afternoon.

Meteorologist's View

Strengthening Southeasterly winds during the afternoon, milder air spreading north later in the day.

Forecast for Friday 29 Nov 2024

Weather: Partly cloudy with some low cloud and drizzle at times particularly around mountains further south and west. A few bright or sunny spells developing especially in the north. Cloud will thicken in the afternoon with some light rain expected by late afternoon.

Maximum wind: Southeasterly 20 mph with gusts 35mph at times.

Chance of cloud-free hill tops above 800m: 50%, more chance further north during the day.

Low Cloud and visibility: Low cloud layers will be broken above 600m around southern Mountains but more scattered above 700m in the north. Cloud will become more extensive later in the afternoon. Visibility will be good for much of the day, perhaps turning moderate in drizzle in the south at times and later in the day as rain arrives.

Temperature: **Valleys:** Plus 5 rising to plus 9 Celsius.
At 800m: Plus 8 Celsius.
Freezing level: Above all summits.
